Job Description for Clinical Trials Manager

About FathomX

FathomX is a Digital Health AI spin-off company from the National University of Singapore and National University Health System and is the brainchild of Dr Mikael Hartman (Breast Cancer Surgeon at NUH) and Dr Feng Meng Ling (Assistant Professor at the Saw Swee Hock School of Public Health). Our flagship product, FxMammo, is an AI Assistant that significantly improves the screening procedure for mammograms by enhancing both the efficiency and accuracy of screening processes.

The roles & responsibilities and requirement of the candidate are as listed below:

Roles and Responsibilities

- Work with various consultants, partners and internal staff to carry out and execute clinical trials for the purposes of commercialisation and regulatory approval
- Guide in the creation of important study documents
- Develop study budgets, oversee patient recruitment and ensure compliance of reader study with standard operating procedures
- Participate in protocol development, CRF Design and clinical study report writing
- Optimise cost and resources of studies

Requirements:

- Thorough understanding of the regulatory approval process for medical devices for various markets
- Extensive knowledge of what it takes to carry out clinical trials and reader studies
- Excellent leadership skills
- Excellent record keeping skills and ability to manage multiple stakeholders

Nice to have:

- A good attitude to learn and be willing to work with different age groups in a startup and research environment.
